Course Overview

Google SketchUp 7/8

- *Bespoke: Project Support*

Description

This course is designed to help you and your team with your SketchUp projects.

We cater for a wide range of subject content and assist in developing the best delivery method and technology to suit your exact needs. We do this, by assigning one of our core team members to you and your project. Each one of our core team members specialise in different market sectors ensuring you get the right skills required for your project.

Together we will accelerate your knowledge and learning; giving you and your colleagues the support and reassurance on the challenging areas of this software.
